Summary

Hello, and thank you for visiting my profile! I'm Sulaimon, a passionate and dedicated individual with a strong interest in frontend development. I am excited and motivated to kickstart my career as a junior frontend developer.

I am an undergraduate student majoring in electrical engineering and have dedicated my academic years to honing my skills in HTML, CSS, JavaScript, and various frontend frameworks. I firmly believe in the power of continuous learning and self-improvement, and I'm always eager to embrace new challenges and technologies.

What I may lack in professional experience, I more than make up for with a genuine enthusiasm for web development. My projects, which you can explore on my GitHub profile, showcase my unwavering determination to learn and grow. I've successfully designed and built responsive websites, experimented with engaging animations, and implemented user-friendly interfaces.

I am actively seeking opportunities to work as a junior frontend developer, where I can collaborate with a supportive team, contribute my skills, and continue to learn and grow in a professional environment. I'm confident in my ability to quickly adapt, learn, and add value to your projects.

My technical skills include:

- HTML5, CSS3, and JavaScript
- Responsive web design
- Frontend frameworks like React and Next.js
- Version control with Git
- Familiarity with UI/UX principles
- Proficiency with No Code tools like Framer and WordPress

I'm eager to connect, collaborate, and contribute in the world of frontend development. Please don't hesitate to reach out if you're looking for an enthusiastic and motivated junior frontend developer or if you have any advice to offer. Let's embark on this exciting journey together!

Experience

Frontend Web Developer

KodeCamp

Aug 2023 - Present (4 months)

Next JS, Rest Api and Typescript

Frontend Developer

Zuri Team, Inc.

Aug 2023 - Present (4 months)

Education
